General Rules.

By Notification of February 19, 1932, all goods, wares, merchandise, not otherwise charged with duty, exempted from duty, prohibited or restricted (*vide* table of prohibitions and restrictions) are subject on first importation to a duty of Rs. 15 for every Rs. 100 of the value thereof, *i.e.*, 15 per cent. *ad valorem*.

By Notification of January 31, 1933, the admission of certain goods, wares, and merchandise, proved to the satisfaction of the Principal Collector of Customs to have been produced or manufactured in, and to have been consigned from, the United Kingdom of Great Britain and Northern Ireland, the Irish Free State, the Indian Empire, the Dominion of Canada, Newfoundland, the Commonwealth of Australia, the Dominion of New Zealand, the Union of South Africa, Southern Rhodesia, one or other of the Imperial Crown Colonies and Protectorates, the Mandated Territory of Tanganyika, the Cameroons under the British Mandate, or Togoland under British Mandate, at the preferential rates of duty respectively prescribed in Column 2 was approved.

The "value" referred to is the true wholesale market value (*vide* section 43 of Ordinance No. 17 of 1869). By section 2 of Ordinance No. 18 of 1896 (as amended by section 4 of Ordinance No. 13 of 1900) "true wholesale market value" is defined as follows :—

- (a) The wholesale cash price, less trade discount for which goods of the like kind and quality are sold, or are capable of being sold, at the time and place of importation, without any abatement or deduction whatever except of the amount of the duties payable on the importation thereof ; or
- (b) Where such price is not ascertainable, the cost at which goods of the like kind and quality could be delivered at such place without any abatement or deduction except of the duties as aforesaid.

NOTES.

Relief to British Subjects resident in the United Kingdom.

Where a British subject resident in the United Kingdom has income derived from Ceylon, he is entitled to special relief which operates up to a limit of approximately £5,000 total income.

The relief reduces the tax to the fraction $\frac{\text{Ceylon income}}{\text{Total income}}$ of the amount which would be payable if the individual concerned were resident in Ceylon and liable to Ceylon tax on his total income.

Double Tax Relief.

Provision is made for relief in Ceylon where the same income is subject to—

- (a) United Kingdom tax and Ceylon tax, or
- (b) Empire tax and Ceylon tax.

Empire tax is defined as being tax imposed in any other part of the Empire which grants double tax relief in respect of the payment of Ceylon tax.

The relief in respect of United Kingdom tax is the amount by which the Ceylon rate of tax exceeds half the United Kingdom rate, with a proviso that the relief shall not exceed half the Ceylon tax.

The relief in respect of Empire tax is half the smaller tax on the income doubly charged.

Husband and Wife.

The income of a married woman who is not separated from her husband is treated as the husband's income.

Deduction of Tax at Source.

Tax is deducted at 10 per cent. from all dividends paid by Ceylon Companies and from interest, rents, and annuities paid by persons in Ceylon to persons out of Ceylon.

LABOUR, WAGES, AND COST OF FOODSTUFFS, &c.

I.—LABOUR.

1. Actual Wages.

The Department of Labour has not yet attempted to conduct an inquiry into current wage rates or earnings in Ceylon, and has little reliable information on the subject (except in respect of Indian labour on estates).

2. Tea, rubber, coconut products.

(a) On lands of which ten acres or more are actually cultivated.

(i.) Statutory minimum rates of wages.

(A) *Imported Indian unskilled agricultural labour*.—Employers are under a statutory obligation to pay wages at rates not less favourable to the labourer than the following, for a day of nine hours, including time not exceeding one hour taken for the midday meal :—

(Subject to alteration.)

			Men. Cents.		Women. Cents.		Children. Cents.
Low-country	..	..	41	..	33	..	24
Mid-country	..	..	43	..	35	..	25
Up-country	..	..	49	..	39	..	29

On the understanding that the issue price of rice should not exceed Rs. 4.80 per bushel.

The above rates, although only legal minima, tend to become standard rates for labourers of average capacity. Industrious pluckers in tea fields and industrious rubber tappers can, however, earn wages at higher rates.

Employers are also under a statutory obligation to provide their labourers with not less than six days' work in the week. In practice, labourers of this class do not as a rule turn out for work six days in every week.

Employers are required by law to pay wages on or before the tenth of the month following that in which they were earned and to send in to the Controller of Labour a monthly declaration that wages were paid according to the requirements of the law.

(B) *Other labour*.—No statutory requirements.

(ii.) Overtime.

(A) *Imported Indian unskilled agricultural labour*.—Overtime must be paid at not less per hour than one-eighth of the legal minimum daily rate applicable.

(B) *Other labour*.—No statutory requirements.

(iii.) Supplementary payments, &c.

(A) *Free housing*.—Always given, by custom, to all classes of labour.

(B) *Free medical attention*.—*Tea and rubber estates*—All classes of labour. Superintendent of estate must by law,—

- (1) inform himself of all cases of sickness on his estate, and take such steps as he may deem best for the immediate relief of the sick, and
- (2) send any labourer to hospital when so required by a medical officer.

As regards coconut estates, please see (b) below.

(C) *Maternity benefits*.—All classes of labour, on *tea and rubber estates*—Superintendent of the estate must by law,—

supply at the cost of the estate every female labourer resident upon the estate, and giving birth thereon to a child, with sufficient food and lodging for one month after the birth of such child.

(D) *Free Rice*.—Under Ordinance No. 34 of 1935 which came into force on October 18, 1935, every employer of Indian Labourers is required to issue one-eighth of a bushel of good unblended rice free of charge each month to every adult Indian male labourer employed on the estate and to every Indian widow resident on the estate who has at least one child under ten years of age dependent on her. As an alternative the employer may with the permission of the Controller of Labour supply free cooked meals to all Indian children under ten years of age on the estate provided that the value of such meals is not less than the value of the rice that would otherwise be supplied.

(iv.) Deductions from wages.

(A) *Imported Indian unskilled agricultural labour*.—The only deductions which may lawfully be made from wages are deductions on account of advances of money made in anticipation of wages and deductions on account of food, clothes and other articles supplied, which the employer is not liable in law to supply at his own expense.

(B) *Other labour*.—No statutory restrictions.

(b) *Other lands*.—Indian and indigenous labour—No statutory requirements or restrictions relating to wages.

(1) Any servant incapacitated by sickness is entitled to food, lodging and medical attention at the expense of his employer who may however restrict his liability by giving a month's notice.

(2) Employment of women and children in Industrial undertakings.—The Washington conventions are applied to Ceylon by Ordinance No. 6 of 1923.

(3) The employment of children under the age of 10 years is prohibited by law.

(4) The Workmen's Compensation Ordinance No. 19 of 1934, came into operation on August 1, 1935. It provides for compensation to be paid by the employer on the lines of the Indian Act to every workman who is injured by accident arising out of and in the course of his employment and to the dependents of workmen who have died as the result of such accident.

METEOROLOGY.

General Remarks.—There is a marked variation in climate between the different parts of Ceylon. Noticeable features everywhere are the small annual range of monthly mean temperature, and the smallness of pressure changes, while the diurnal range of temperature is largely a function of the direction of the seasonal winds.

In the low-country, the mean annual temperature varies very little from 80°F. There is, however, wide divergence between the moist conditions in the south-west of the Island, where the average annual rainfall varies from 100 to over 200 inches, and the dry zone areas elsewhere, where prolonged droughts are the rule during the south-west monsoon, and where some districts, in the north, north-west, and south-east, have annual averages of less than 50 inches.

Up-country, with altitudes up to over 8,000 feet, a cooler climate is experienced, with a corresponding change in vegetation.

Rainfall.—This continued, on the whole, below average during the greater part of 1935. However, excess in the last two or three months of the year, particularly in December, to some extent made up the earlier deficits.

Yearly totals were below normal in most districts, excess being mainly confined to the Northern Province, the Trincomalee district, the country immediately to the west and south of Colombo, and the greater part of the Southern Province. The Jaffna Peninsula showed the greatest excess, while deficits were greatest on the western slopes of the hills.

The highest yearly totals recorded were 210·03 inches at Kenilworth, and 200·53 inches at Carney. Other stations recording over 180 inches were Kahagalla, Halwatura, Padupola, and Maliboda. The greatest excess above average was 27·7 inches, at Kayts. Other excesses of over 25 inches were recorded at Nilloomally, Chavakachcheri, and Jaffna College. The highest averages (1911–30) are at Carney, 231·6 inches, Watawala, 219·5 inches, and Kenilworth, 219·2 inches. Other yearly averages over 200 inches are at Ingoya, Maliboda, Padupola, and Blackwater.

The lowest totals for the year were 35·27 inches, at Nachchikkali, 35·53 inches, at Tissamaharama, and 35·81 inches, at Wirawila. Totals under 40 inches were also reported from Mannar Kachcheri, Migahajandura, Talaimannar, Yala, Madurankuli, and Palatupana Lewaya. The greatest deficits below average were reported from Watawala, 43·0 inches, and Oonoogaloya, 39·6 inches, while deficits of over 30 inches were also reported from Ingoya, Blackwater, and Carney. The lowest rainfall average (1911–30) is 35·7 inches, at Yala, while other averages under 40 inches are at Marichchukkadi, Nachchikkali, Ponparippu, Kalpitiya, Mannar Waterworks, and Mannar Kachcheri.

Temperature.—The low-country stations with the highest and lowest mean shade temperatures for 1935 were Trincomalee, with 82·2°F, and Galle, with 79·6°F. The figures for Colombo and Kandy were 80·2°F and 77·2°F, respectively, while Nuwara Eliya, at an elevation of over 6,000 feet, had a mean shade temperature of 59·6°F. The highest shade temperature recorded during the year was 100·7°F, at Batticaloa, on June 2. The lowest shade temperature this year at low-country stations was 57·3°F, at Anuradhapura, on March 1. The lowest shade temperature recorded during the year at Nuwara Eliya was 33·1°F, on February 8. The highest shade temperature in Colombo in 1935 was 93·2°F, on March 12, and the lowest, 67·1°F, on January 4. The mean daily range for 1935 (the difference between the mean of the maxima and the mean of the minima) was greatest at Nuwara Eliya and Badulla, 18·2°F, and lowest at Galle, 8·3°F, and Jaffna, 8·6°F. The absolute range for the year (the difference between the highest and the lowest readings recorded at any one station) was greatest at Nuwara Eliya, 44·5°F, and lowest at Galle, 21·1°F.

Remarks on the Tables.—Owing to the necessity for preparing the meteorological tables for the Ceylon Blue Book earlier, a number of these tables have been cut out of this section. Tables XIV., XV., XVII., XVIII, and XIX. of 1934 no longer appear here, and table XVI. has been renumbered table XIV. The tables omitted will, however, continue to appear in the Colombo Observatory Annual Report.

The thermometers at all the climatological stations in Ceylon are now exposed in large sized Stevenson Screens. Temperatures and averages are taken entirely from screen readings.

The monthly mean temperatures of tables II. and V. are the means of the monthly mean maximum and the monthly mean minimum temperatures.

TABLE VIII.—Monthly Means during 1935 of the Relative Humidity obtained from Dry and Wet-bulb readings at 9.30 A.M. and 3.30 P.M., with the Offsets from Average. Averages are taken generally over the standard period 1911–30, except at Hakgala, where the site of the station was changed at the end of 1925, and averages are taken over the period 1926–34.

The averages are taken from observed values, whether shed or screen. Errors caused by the imperfections of the shed exposures are too small to justify the deletion of shed values as yet.

TABLE IX.—Monthly Means during 1935 of the Relative Humidity obtained from the Minimum Dry and Wet-bulbs readings, with the Offsets from Average. Averages are taken as in the preceding table.

The minimum dry and the minimum wet-bulb temperatures do not necessarily occur at the same instant, and a consequent uncertainty is introduced. The evidence of thermographs shows that the uncertainty is very small, and the publication of this table seems desirable owing to the fact that the relative humidity at night differs considerably from that during the day, and hence Table VIII. alone gives a very incomplete statement of conditions as a whole.

TABLE X.—Monthly Means during 1935 of the Air Pressure in Ceylon, corrected to 32° F, 45° latitude, and, in the case of low-country stations, to sea level. The values given are at 9.30 and 15.30, which are practically the daily maximum and minimum values. The whole number is 29 inches, except for the up-country stations Kandy (28), Badulla (27), Diyatalawa (25), and Nuwara Eliya (23 or 24). The index correction at Trincomalee was increased by .015 inch during 1935. In this table the new correction has been applied throughout the year.

TABLE XI.—Offsets from Average of the Monthly Mean Pressures during 1935, in decimals of an inch of mercury. Averages are taken in general over a standard period 1912–30.

Taking a millibar as roughly equal to 0·03 inch, it will be seen that the offsets do not range much beyond one millibar.

TABLE XII.—Monthly Means during 1935 of Daily Wind Mileage, with the Offsets from Average. Averages are taken generally over the standard period 1911–30, though at some stations a few of the monthly means during this period have been cancelled. At Little Basses Lighthouse, where an anemometer was installed in 1922, the averages are taken over the 12 years 1923–34, and at Batticaloa, where there was the equivalent of a slight change of site at the end of 1925, the averages are taken over the 9 years 1926–34. The figures given for Little Basses Lighthouse are face values of the instrument, owing to the difficulty of standardizing instruments here for the high values so frequently experienced at that station. Owing to a defect in the anemometer at Hambantota, causing that instrument to underestimate, monthly means for that station are not given this year.

TABLE XIII.—Percentage of Wind Directions in 1935. Average values of frequencies are not given in this Report owing to the exigencies of space, but can be seen in the 1926 Report. Observations are made to sixteen points, but are summarized here in terms of eight points only.

It will be noticed that in some cases these percentages do not add up exactly to 100. This is because each percentage is taken to the nearest unit only, and it may happen that the approximations are mostly upwards or mostly downwards.

All dates in this table refer to rainfall days, e.g., January 5th refers to the 24 hours commencing with the morning observation of that date.

The rainfall averages (number of inches) are for the standard period 1911-30, or are corrected to that period by comparison with neighbouring stations.

The rainfall averages (number of days) are for the standard 20 years 1911-30, or for a slightly smaller number of the same years (in no case, in this table, less than 17), uncorrected.

The figures for number of days in this table, whether averages or for the current year, are derived from climatological stations, estate rain-gauges, or observations that had been wired daily to Colombo. The only exceptions are some of the figures from Labugama Waterworks.

The number of years for which observations are available is given in brackets after the greatest daily rainfall on record, which is for the whole period of observations, not necessarily 1911-30.

* Low water ordinary spring tide.

† Depth over sill high water ordinary neap tide.

‡ Even vessels of a larger tonnage can be berthed.

II.—HARBOUR FACILITIES.

Colombo Harbour.

There are no enclosed wet docks. Vessels lie at moorings in the shelter of the breakwaters, and are loaded or discharged from lighters.

There are seven berths available during the south-west monsoon and four during the north-east monsoon for vessels drawing up to 33 feet of water; the area being deepened to 36 feet below low water ordinary spring tide, for vessels of 33 feet draught, is being extended. The Port can accommodate 36 vessels in the north-east monsoon, and 39 vessels in the south-west monsoon, excluding accommodation at the Graving Dock Guide Pier and Oil Jetties.

There are three oil jetties and one pier available for shipping as follows :—

Discharge Jetty, where vessels of 500 feet length and 27 feet draught can be berthed.

Outer Bunkering Jetty, where vessels of 500 feet length and 27 feet draught can be berthed.

Inner Bunkering Jetty, for bunkering barges only.

Graving Dock Guide Pier, length 800 feet, at present available for vessels of 29 feet draught for a length of 580 feet and of 27 feet draught for the remainder when not required for docking purposes.

In addition to the Graving Dock, there is a Patent Slip capable of taking vessels up to 1,200 tons dead weight. The Port is equipped with a thoroughly up-to-date Oil Installations Dépôt, which is directly connected with the Harbour front by pipe lines. Ships bunker either at the Graving Dock Guide Pier and Oil Jetties or in the stream from barges.

Galle Harbour.

There are six berths accommodating vessels up to 450 feet in length and 27 feet draught.

Ships are moored head and stern with their own bower anchors and stern moorings supplied by the Harbour authorities.

Cargo is landed by means of lighters at three piers, which have depths of up to 6 feet alongside.

The anchorage is exposed, particularly during the south-west monsoon.

Pilotage is compulsory.

Ships are taken out, but not brought in during the night.

Trincomalee Harbour.

The maximum depth of water available at the Customs House Jetty ordinary low spring tide is 6 feet 4 inches and of China Bay is 10 feet.

The length of the Customs House Jetty is 300 feet and that of China Bay is 397 feet.

There are no Pilots. Vessels can enter or leave by day or night.
